Stand Approval Form

Deadline: 18 January 2019

All exhibiting companies must obtain written approval for their stand design!

Construction of the stand may only commence after approval has been granted. Stand constructions which have not been approved and/or do not comply with the [display regulations](#) or legal provisions may have to be altered or removed.

Please submit the drawings of the stand design, including measurements for all fixtures, components, and identification signs (indicating stand height and distance from the aisle) that will be used in the exhibit. Drawings must clearly demonstrate that the design is within the guidelines established for the stand type in which your company is located.

Please Note: This form serves as approval of the stand design only. Exhibiting companies are responsible for ensuring the structural integrity of their exhibit. All exhibitors must read and understand the [Brussels Expo Health & Safety Regulations](#), and it is required that all Lead exhibitors submit the [Brussels Expo SAFETY, HEALTH and ENVIRONMENTAL CHARTER \(SHE Charter\)](#).

If you make a change to your design, it is imperative that you send your updated design to Operations to review and approve. Failure to do so may result in you not being allowed to build the updates according to most recent design.

If you are unable to complete the form electronically, please print the form and e-mail or fax the completed version to Parker Swenson at pswenson@divcom.com. The customer service team can be reached via phone at +1 207-842-5504.

I understand that storage behind stands & use of any unpaid space is prohibited and that failure to adhere to this regulation will result in a fine to be paid by the exhibitor.*

Yes

I understand that the reverse side of all stand backwall and sidewalls must be fully finished and painted in a neutral color (black/white) above a height of 2.5m so as to not interfere with the designs of the neighboring stand*.

Yes

Powered by Formstack [Create your own form >](#)

I understand all graphics or logos that face neighboring stands must be at least two meters away from said neighboring stand*

Yes

I understand that aisle-side walls must include a natural break or clear/no color plexi panel of at least 2 meters for every 4 linear meters of solid wall. Solid walls over 4m in length must be pushed back at least 2m away from the aisle. Any aisle-side wall that exceeds 4 meters in length must be 1 meter in height or lower.*

Yes

If you have any questions on the above regulations, please be sure to contact Parker Swenson at pswenson@divcom.com for clarification. Please be sure that you have read the Design Regulations for all stands at Seafood Expo Global.
